

Laravel Developer - PHP/Larael/VueJS Developer

Pay: £40,000.00-£60,000.00 per year

We are currently looking for a part-time full stack PHP/Laravel/VueJS developer to help with ongoing maintenance of our ecosystem of apps, and development of new projects.

The part time nature is flexible, and could be used to work around an existing job or contract, or add some consistent hours on top of your freelance work.

The Health & Education co-operative provides quality e-learning tools to the university and healthcare sectors, we currently have a number of custom PHP applications that facilitate e-learning, online communities, and more.

Required skills:

- Expertise with professional development of modern PHP (Version 8) and MySQL web applications.
- Expertise with the Laravel PHP framework, along with some of its first party packages.
- Good working knowledge of GIT version control.
- Good working knowledge of modern Javascript and at least one framework (React/Svelte/Vue - we use VueJS).
- Decent knowledge of the CLI/Terminal and the ability to navigate and use remote servers.
- Experience with handling production errors using an exception tracking tool (we use Sentry).
- Good working knowledge of building secure web applications.

Nice to have but not essential:

- Experience with Laravel Livewire
- Experience with Laravel Nova
- Experience with integrating with Stripe and using Laravel Cashier
- Experience integrating with external API services

Your responsibilities would be:

Supporting Operations

You'd be tasked with supporting our day to day operations, ensuring that the systems we have are running smoothly, while responding to any requests for further information from our databases that the admin team cannot access. Any bugs or problems encountered by our operations team would be passed to you for assessment, reproduction and fixing if necessary.

Ongoing Development

The Health & Education Co-operative works constantly with universities and other entities to deliver new products and improve existing ones. You'd be responsible for planning and implementing new features on our existing systems, as well as starting new projects from scratch.

Benefits:

- Additional leave
- Company pension
- Remote (Work From Home)

Schedule:

- Flexitime - Monday to Friday

Experience:

- working with javascript: 2 years (required)
- development of PHP and MySQL: 2 years (required)
- Laravel: 3 years (required)

Work Location: Remote

Application deadline: **05/08/2025**

Reference ID: PHP
